HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Stated in US Dollars)

1. Organization and Basis of Presentation

Highpower International, Inc. ("Highpower" or the "Company," formerly known as Hong Kong Highpower Technology, Inc.) was incorporated in the State of Delaware on January 3, 2006 to locate a suitable acquisition candidate to acquire.

The Company's wholly owned subsidiary, Hong Kong Highpower Technology Company Limited, a company incorporated in Hong Kong ("HKHTC"), was organized principally to engage in the manufacturing and trading of nickel metal hydride rechargeable batteries.

As used herein, the "Company" refers to Highpower and its wholly-owned subsidiaries, unless the context indicates otherwise.

In January 2008, HKHTC invested \$749,971 in HZ Highpower Technology Co., Ltd. ("HZ Highpower"). HZ Highpower is a wholly-owned subsidiary of HKHTC. HZ Highpower has not commenced business as at September 30, 2010.

In June 20, 2008, HKHTC invested \$250,000 in Spring Power Technology (Shenzhen) Co., Ltd. ("SZ Spring Power", formerly known as Sure Power Technology (Shenzhen) Co., Ltd.) which became a wholly-owned subsidiary of HKHTC. On July 9, 2008, HKHTC invested an additional \$750,000 in SZ Spring Power. SZ Spring Power commenced business in June 2008 and specializes in researching and manufacturing Lithium-ion rechargeable batteries.

On June 19, 2008, the Company effected a 5-for-8 reverse stock split of the Company's issued and outstanding shares of common stock (the Reverse Stock Split). The par value and number of authorized shares of the common stock remained unchanged. All references to number of shares and per share amounts included in these consolidated financial statements and the accompanying notes have been adjusted to reflect the Reverse Stock Split retroactively..

The Company's common stock commenced trading on the Nasdaq Global Market on December 21, 2009. Prior to December 21, 2009, shares of the Company's common stock were listed for trading on the NYSE Amex.

On June 19, 2008, the Company issued 603,750 shares of common stock upon the closing of a public offering. The Company's sale of common stock, which was sold indirectly by the Company to the public at a price of \$3.25 per share, resulted in net proceeds of \$1,486,400. These proceeds were net of underwriting discounts and commissions, fees for legal and auditing services, and other offering costs.

On June 19, 2008, the Company issued 160,000 shares of common stock upon the closing of the public offering. The shares are treated as compensation for investor relations services. The services provided were for the period of one year from the date of June 19, 2008 pursuant to a one-year contract with this investor relations firm, which has expired.

On November 18, 2009, HKHTC invested an additional \$1,227,487 in SZ Highpower.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

1. Organization and Basis of Presentation (continued)

On May 25 2010, the Company invested \$142,515 in Springpower International, Inc. (“Springpower International”) which became an associate of HKHTC. Springpower International, which is incorporated in Canada, mainly researches and develops advanced, high performance battery materials and clean energy materials.

On September 21, 2010, the Company invested \$293,574 in Ganzhou Highpower Technology Co., Ltd. (“GZ Highpower”). GZ Highpower is a wholly owned subsidiary of SZ Highpower. GZ Highpower is expected to engage in trading and research of batteries, and it has not commenced business as at September 30, 2010.

In October 20, 2010, with stockholders’ approval, the Company officially changes its name from Hong Kong Highpower Technology, Inc. to Highpower International, Inc.

Description of business

The subsidiaries of the Company include the following:

Name of company	Place and date of incorporation	Attributable equity interest held	Principal activities
Hong Kong Highpower Technology Co., Ltd (“HKHTC”)	Hong Kong July 4, 2003	100%	Investment holding
Shenzhen Highpower Technology Co., Ltd (“SZ Highpower”)	PRC October 8, 2002	100%	Manufacturing of batteries
HZ Highpower Technology Co., Ltd (“HZ Highpower”)	PRC January 29, 2008	100%	Inactive
Spring Power Technology (Shenzhen) Co., Ltd (“SZ Spring Power”)	PRC June 4, 2008	100%	Manufacturing of batteries
Ganzhou Highpower Technology Co., Ltd (“GZ Highpower”)	PRC September 21, 2010	100%	Trading and research of batteries

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

1. Organization and Basis of Presentation (continued)

The associate of the Company includes the following:

<u>Name of company</u>	<u>Place and date of incorporation</u>	<u>Attributable equity interest held</u>	<u>Principal activities</u>
Springpower International, Inc. ("Springpower International")	Canada March 22, 2010	40%	Research and development of batteries

2. Summary of significant accounting policies

Basis of presentation

The accompanying consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States of America. The consolidated financial statements for the interim periods are unaudited. In the opinion of management, these consolidated financial statements, include all adjustments, including normal recurring adjustments, necessary for their fair presentation. Interim results are not necessarily indicative of results of operations to be expected for a full year. The accompanying consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission and do not include all information and footnotes necessary for a complete presentation of financial statements in conformity with accounting principles generally accepted in the United States. These financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2009.

On June 29, 2009, the Financial Accounting Standards Board (FASB) established the FASB Accounting Standards Codification (Codification) as the single source of authoritative U.S. generally accepted accounting principles (GAAP) for all nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) are also sources of authoritative U.S. GAAP for SEC registrants. The Codification does not change U.S. GAAP but takes previously issued FASB standards and other U.S. GAAP authoritative pronouncements, changes the way the standards are referred to, and includes them in specific topic areas. The Codification is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of the Codification did not have any impact on the Company's financial statements.

Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation

Use of estimates

In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the dates of the financial statements, as well as the reported amounts of revenues and expenses during the reporting periods. These accounts and estimates include, but are not limited to, the valuation of accounts receivable, inventories, deferred income taxes and the estimation on useful lives of plant and equipment. Actual results could differ from those estimates.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

2. **Summary of significant accounting policies (continued)**

Comparative amounts

Certain comparative amounts in prior periods have been reclassified to conform to the current period's presentation. The principal reclassification related to the separate presentation of loss on exchange rate difference as an operating cost line item in the statement of operations, which was previously included in general and administrative costs. These reclassifications had no effect on reported total assets, liabilities, stockholders' equity, or net income (loss).

Economic and political risks

The Company's operations are conducted in the People's Republic of China (the "PRC"). Accordingly, the Company's business, financial condition and results of operations may be influenced by the political, economic and legal environment in the PRC and by the general state of the PRC economy.

The Company's operations in the PRC are subject to special considerations and significant risks not typically associated with companies in North America and Western Europe. These include risks associated with, among others, the political, economic and legal environment and foreign currency exchange. The Company's results may be adversely affected by changes in the political and social conditions in the PRC and by changes in governmental policies with respect to laws and regulations, anti-inflationary measures, currency conversion, remittances abroad and rates and methods of taxation, among other things.

Concentrations of credit risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of accounts receivable. The Company extends credit based on an evaluation of the customer's financial condition, generally without requiring collateral or other security. In order to minimize the credit risk, the management of the Company has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. Further, the Company reviews the recoverable amount of each individual trade debt at each balance sheet date to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Company's credit risk is significantly reduced. Other than set forth below, no customers represented 10% or more of the Company's net sales and accounts receivable.

A substantial percentage of the Company's sales are made to the following customers. Details of the customers accounting for 10% or more of total net revenue in any of the nine months ended September 30, 2010 and 2009 are as follows:

	<u>2010</u>	<u>2009</u>
Company A	24%	21%
Company B	*	10%
* Less than 10%		
	<u>24%</u>	<u>31%</u>

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

2. **Summary of significant accounting policies (continued)**

Concentrations of credit risk (Continued)

Details of the accounts receivable from the customers with the largest receivable balances at of September 30, 2010 and 2009 are as follows:

	<u>Percentage of accounts receivable</u>	
	<u>September 30,</u> <u>2010</u>	<u>September 30,</u> <u>2009</u>
Company A	40%	24%
Company B	10%	10%
Company C	*	12%
Company D	21%	*
* Less than 10%		
Largest receivable balances	<u>71%</u>	<u>46%</u>

Cash and cash equivalents

Cash and cash equivalents include all cash, deposits in banks and other liquid investments with initial maturities of three months or less.

Restricted cash

Certain cash balances are held as security for short-term bank borrowings and are classified as restricted cash in the Company's balance sheets.

Accounts receivable

Accounts receivable are stated at the original amount less an allowance made for doubtful receivables, if any, based on a review of all outstanding amounts at period end. An allowance is also made when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of receivables. Bad debts are written off when identified. The Company extends unsecured credit to customers in the normal course of business and believes all accounts receivable in excess of the allowances for doubtful receivables to be fully collectible. The Company does not accrue interest on trade accounts receivable.

The Company experienced bad debts of \$9,408 and \$58,407 during the nine months ended September 30, 2010 and 2009, respectively.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

2. **Summary of significant accounting policies (continued)**

Inventories

Inventories are stated at the lower of cost or market value. Cost is determined on a weighted average basis and includes purchase costs, direct labor and factory overheads. There are no significant freight charges, inspection costs and warehousing costs incurred for any of the periods presented. In assessing the ultimate realization of inventories, management makes judgments as to future demand requirements compared to current or committed inventory levels. The Company's reserve requirements generally increase based on management's projected demand requirements, and decrease due to market conditions and product life cycle changes. During the nine months ended September 30, 2010 and 2009, the Company did not make any allowance for slow-moving or defective inventories. The Company's production process results in a minor amount of waste materials. The Company does not record a value for the waste in its cost accounting. The Company records proceeds on an as realized basis, when the waste is sold. The Company has offset the proceeds from the sales of waste materials as a reduction of production costs. Proceeds from the sales of waste materials were approximately \$53,877 and \$132,662 for the nine months ended September 30, 2010 and 2009, respectively. Generally, waste materials on hand at the end of a year are nominal.

Plant and equipment

Plant and equipment are stated at cost less accumulated depreciation. Cost represents the purchase price of the asset and other costs incurred to bring the asset into its existing use. Maintenance, repairs and betterments, including replacement of minor items, are charged to expense; major additions to physical properties are capitalized.

Depreciation of plant and equipment is provided using the straight-line method over their estimated useful lives at the following annual rates:

Buildings	5% - 10%
Furniture, fixtures and office equipment	20%
Leasehold improvement	50%
Machinery and equipment	10%
Motor vehicles	20%

Upon sale or disposition, the applicable amounts of asset cost and accumulated depreciation are removed from the accounts and the net amount less proceeds from disposal is charged or credited to income.

Construction in progress represents the properties and plant and machinery in the course of development for production or buildings under development and are stated at cost, less any identified impairment losses. When the construction is completed and the asset is ready for its intended use, the related cost is transferred to an appropriate category of property, plant and equipment and depreciated in accordance with the above policy.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

2. Summary of significant accounting policies*(continued)*

Investment Securities

Investments in less than twenty percent owned entities are accounted for under the cost basis and are reviewed for impairment periodically.

Management have strategic investments in certain debt and equity securities that are included in noncurrent "Investment securities" on our Consolidated Balance Sheets accounted for using the cost methods of accounting.

The Company ability to realize value from our strategic investments in companies that are not publicly traded depends on the success of those companies' businesses and their ability to obtain sufficient capital to execute their business plans. Because private markets are not as liquid as public markets, there is also increased risk that we will not be able to sell these investments, or that when we desire to sell them we will not be able to obtain fair value for them.

Intangible Assets and Long-Lived Assets

FASB ASC 350 "Intangibles – Goodwill and Other," requires purchased intangible assets other than goodwill to be amortized over their useful lives unless these lives are determined to be indefinite. Accordingly, the consumer battery license is being amortized over its useful life of 20 years. The Company does not have any goodwill.

The Company accounts for the impairment of long-lived assets, such as plant and equipment, leasehold land and intangible assets, under the provisions of FASB ASC 360 "Property, Plant and Equipment – Overall". ASC 360 establishes the accounting for impairment of long-lived tangible and intangible assets other than goodwill and for the disposal of a business. Pursuant to ASC 360, the Company periodically evaluates, at least annually, whether facts or circumstances indicate that the carrying value of its depreciable assets to be held and used may not be recoverable. If such circumstances are determined to exist, an estimate of undiscounted future cash flows produced by the long-lived asset, or the appropriate grouping of assets, is compared to the carrying value to determine whether impairment exists. In the event that the carrying amount of long-lived assets exceeds the undiscounted future cash flows, then the carrying amount of such assets is adjusted to their fair value. The Company reports an impairment cost as a charge to operations at the time it is recognized.

There was no impairment of long-lived assets for the nine months ended September 30, 2010 and 2009.

Revenue recognition

The Company recognizes revenue when the goods are delivered and the customer takes ownership and assumes risk of loss, collection of the relevant receivable is probable, persuasive evidence of an arrangement exists and the sales price is fixed or determinable. Sales of goods represent the invoiced value of goods, net of sales returns, trade and allowances.

The Company does not have arrangements for returns from customers and does not have any future obligations directly or indirectly related to product resales by customers. The Company has no incentive programs.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

2. Summary of significant accounting policies (continued)

Advertising and promotion expenses

Advertising and promotion expenses are charged to expense as incurred.

Advertising and promotion expenses, which are included in selling and distribution costs, were not material for the nine months ended September 30, 2010 and 2009.

Income taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in consolidated statements of income in the period that includes the enactment date or date of change in tax rate. A valuation allowance is provided to reduce the amount of deferred tax assets if it is considered more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company adopted FASB ASC 740, "Accounting for Uncertainty in Income Taxes" clarifies the accounting for uncertain tax positions. This interpretation requires that an entity recognizes in the consolidated financial statements the impact of a tax position, if that position is more likely than not of being sustained upon examination, based on the technical merits of the position. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgement occurs. The Company has elected to classify interest and penalties related to unrecognized tax benefits, if and when required, as a component of income tax expense in the consolidated statements of income. According to the PRC Tax Administration and Collection Law, the statute of limitations is three years if the underpayment of taxes is due to computational errors made by the taxpayer or the withholding agent. The statute of limitations is extended to five years under special circumstances, which are not clearly defined. In the case of a related party transaction, the statute of limitation is ten years. There is no statute of limitation in the case of tax evasion. The adoption of ASC 740 did not have a significant effect on the consolidated financial statements.

Comprehensive income

The Company has adopted FASB ASC 220 "Comprehensive income", which establishes standards for reporting and display of comprehensive income, its components and accumulated balances. Accumulated other comprehensive income represents the accumulated balance of foreign currency translation adjustments of the Company.

Foreign currency translation

The functional currency of the Company is the Renminbi ("RMB"). The Company maintains its financial statements in the functional currency. Monetary assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at rates of exchange prevailing at the balance sheet dates. Transactions denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transaction. Exchange gains or losses arising from foreign currency transactions are included in the determination of net income for the respective year.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

2. **Summary of significant accounting policies (continued)**

Foreign currency translation (continued)

For financial reporting purposes, the financial statements of the Company, which are prepared using the functional currency, are then translated into United States dollars. Assets and liabilities are translated at the exchange rates at the balance sheet dates and revenue and expenses are translated at the average exchange rates and stockholders' equity is translated at historical exchange rates. Any translation adjustments resulting are not included in determining net income but are included in foreign exchange adjustment in other comprehensive income, a component of stockholders' equity.

	September 30, 2010	September 30, 2009
Quarter end RMB : US\$ exchange rate	6.8126	6.8178
Average quarterly RMB : US\$ exchange rate	6.8150	6.8425

The RMB is not freely convertible into foreign currency and all foreign exchange transactions must take place through authorized institutions. No representation is made that RMB amounts could have been, or could be, converted into US\$ at rates used in translation.

Transactions and balances

Transactions in foreign currencies are translated into the functional currency at the approximate rates of exchange ruling on the transaction date. Exchange gains and losses resulting from this translation policy are recognized in the statements of operations.

Fair value of financial instruments

The carrying values of the Company's financial instruments, including cash and cash equivalents, restricted cash, trade and other receivables, deposits, trade and other payables, approximate their fair values due to the short-term maturity of such instruments. The carrying amounts of borrowings approximate their fair values because the applicable interest rates approximate current market rates.

The Company is exposed to certain foreign currency risk from export sales transactions and the related accounts receivable as they will affect the future operating results of the Company.

Foreign currency derivative

From time to time the Company may utilize forward foreign currency exchange contracts to reduce the impact of foreign currency exchange rate risks. Forward contracts are cash flow hedges of the Company's foreign currency exposures and are recorded at the contract's fair value. The effective portion of the forward contract is initially reported in "Accumulated other comprehensive income," a component of shareholders' equity, with a corresponding asset or liability recorded based on the fair value of the forward contract. When the hedged transaction is recorded (generally when revenue on the associated sales contract is recognized), any unrecognized gains or losses are reclassified into results of operations in the same period. Any hedge ineffectiveness is recorded to operations in the current period. The Company measures hedge effectiveness by comparing changes in fair values of the forward contract and expected cash flows based on changes in the spot prices of the underlying currencies. Cash flows from forward contracts accounted for as cash flow hedges are classified in the same category as the cash flows from the items being hedged.

2. **Summary of significant accounting policies***(continued)*

Earnings per share

The Company reports earnings per share in accordance with FASB Accounting Standard Codification Topic 260 (“ASC 260”) “Earnings Per Share.” Basic earnings per share is computed using the weighted average number of common shares outstanding during the periods presented. The weighted average number of shares represents the common stock outstanding during the years, as adjusted retroactively to reflect the November 2007 recapitalization as described at Note 1. Diluted earnings per common share computations are based on the weighted average number of common shares outstanding during the period, plus the dilutive effect of stock options, warrants and restricted stock awards.

Stock-Based Compensation

The Company accounts for stock-based payment transactions in which the Company receives employee services in exchange for (a) equity instruments of the enterprise or (b) liabilities that are based on the fair value of the enterprise’s equity instruments or that may be settled by the issuance of such equity instruments. Stock-based compensation cost for restricted stock units (“RSUs”) is measured based on the closing fair market value of the Company’s common stock on the date of grant. Stock-based compensation cost for stock options is estimated at the grant date based on each option’s fair-value as calculated by the Black-Scholes-Merton (“BSM”) option-pricing model. The Company recognizes stock-based compensation cost as expense ratably on a straight-line basis over the requisite service period. The Company will recognize a benefit from stock-based compensation in equity if an incremental tax benefit is realized by following the ordering provisions of the tax law. In addition, the Company accounts for the indirect effects of stock-based compensation on the research tax credit, the foreign tax credit and the domestic manufacturing deduction through the income statement. Further information regarding stock-based compensation can be found in Note 9, “Shareholders’ Equity and Stock-Based Compensation.”

Share-based compensation expense was \$97,525 and \$216,667 and for the nine months ended September 30, 2010 and 2009, respectively.

Recently issued accounting pronouncements

ASC 805, Business Combinations (“ASC 805”) (formerly included under Statement of Financial Accounting Standards No. 141 (revised 2007), Business Combinations) contains guidance that was issued by the FASB in December 2007. It requires the acquiring entity in a business combination to recognize all assets acquired and liabilities assumed in a transaction at the acquisition-date fair value, with certain exceptions. Additionally, the guidance requires changes to the accounting treatment of acquisition related items, including, among other items, transaction costs, contingent consideration, restructuring costs, indemnification assets and tax benefits. ASC 805 also provides for a substantial number of new disclosure requirements. ASC 805 also contains guidance that was formerly issued as FSP FAS 141(R)-1, Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies which was intended to provide additional guidance clarifying application issues regarding initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. ASC 805 was effective for business combinations initiated on or after the first annual reporting period beginning after December 15, 2008. The Company implemented this guidance effective January 1, 2009. Implementing this guidance did not have an effect on the Company’s financial position or results of operations; however it will likely have an impact on the Company’s accounting for future business combinations, but the effect is dependent upon acquisitions, if any, that are made in the future.

In March 2008, the FASB issued ASC 815 (formerly SFAS No. 161, “Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133”) to amend and expand the disclosures about derivatives and hedging activities. The standard requires enhanced qualitative disclosures about an entity’s objectives and strategies for using derivatives, and tabular quantitative disclosures about the fair value of derivative instruments and gains and losses on derivatives during the reporting period. This standard is effective for both fiscal years and interim periods that begin after November 15, 2008. The adoption of this standard on December 29, 2008, the beginning of the Company’s fiscal year, did not have a material impact on its consolidated financial statements.

ASC 855, Subsequent Events (“ASC 855”) (formerly Statement of Financial Accounting Standards No. 165, Subsequent Events) includes guidance that was issued by the FASB in May 2009, and is consistent with current auditing standards in defining a subsequent event. Additionally, the guidance provides for disclosure regarding the existence and timing of a company’s evaluation of its subsequent events. ASC 855 defines two types of subsequent events, “recognized” and “non-recognized”. Recognized subsequent events provide additional evidence about conditions that existed at the date of the balance sheet and are required to be reflected in the financial statements. Non-recognized subsequent events provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date and, therefore; are not required to be reflected in the financial statements. However, certain non-recognized subsequent events may require disclosure to prevent the financial statements from being misleading. This guidance was effective prospectively for interim or annual financial periods ending after June 15, 2009. The Company implemented the guidance included in ASC 855 as of April 1, 2009. The effect of implementing this guidance was not material to the Company’s financial position or results of operations.

2. **Summary of significant accounting policies***(continued)*

Recently issued accounting pronouncements (continued)

In August 2009, the FASB issued Accounting Standards Update (“ASU”) 2009-05, which amends ASC Topic 820, Measuring Liabilities at Fair Value, which provides additional guidance on the measurement of liabilities at fair value. These amended standards clarify that in circumstances in which a quoted price in an active market for the identical liability is not available, we are required to use the quoted price of the identical liability when traded as an asset, quoted prices for similar liabilities, or quoted prices for similar liabilities when traded as assets. If these quoted prices are not available, we are required to use another valuation technique, such as an income approach or a market approach. These amended standards are effective for us beginning in the fourth quarter of fiscal year 2009. There was no material impact upon the adoption of this standard on the Company’s consolidated financial statements.

In September 2009, the FASB issued ASU 2009-06, Income Taxes (Topic 740), “Implementation Guidance on Accounting for Uncertainty in Income Taxes and Disclosure Amendments for Nonpublic Entities”, which provides implementation guidance on accounting for uncertainty in income taxes, as well as eliminates certain disclosure requirements for nonpublic entities. For entities that are currently applying the standards for accounting for uncertainty in income taxes, this update shall be effective for interim and annual periods ending after September 15, 2009. For those entities that have deferred the application of accounting for uncertainty in income taxes in accordance with paragraph 740-10-65-1(e), this update shall be effective upon adoption of those standards. The adoption of this standard is not expected to have an impact on the Company’s consolidated financial position and results of operations since this accounting standard update provides only implementation and disclosure amendments.

In September 2009, the FASB has published ASU 2009-12, “Fair Value Measurements and Disclosures (Topic 820) - Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)”. This ASU amends Subtopic 820-10, “Fair Value Measurements and Disclosures – Overall”, to permit a reporting entity to measure the fair value of certain investments on the basis of the net asset value per share of the investment (or its equivalent). This ASU also requires new disclosures, by major category of investments including the attributes of investments within the scope of this amendment to the Codification. The guidance in this update is effective for interim and annual periods ending after December 15, 2009. Early application is permitted. The Company is in the process of evaluating the impact of this standard on its consolidated financial position and results of operations.

In October 2009, the FASB has published ASU 2009-13, “Revenue Recognition (Topic 605)-Multiple Deliverable Revenue Arrangements”, which addresses the accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. Specifically, this guidance amends the criteria in Subtopic 605-25, “Revenue Recognition-Multiple-Element Arrangements”, for separating consideration in multiple-deliverable arrangements. This guidance establishes a selling price hierarchy for determining the selling price of a deliverable, which is based on: (a) vendor-specific objective evidence; (b) third-party evidence; or (c) estimates. This guidance also eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method and also requires expanded disclosures. The guidance in this update is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company’s consolidated financial position and results of operations.

2. **Summary of significant accounting policies***(continued)*

Recently issued accounting pronouncements (continued)

ASC 105, Generally Accepted Accounting Principles (“ASC 105”) (formerly SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162), reorganized by topic existing accounting and reporting guidance issued by the Financial Accounting Standards Board (“FASB”) into a single source of authoritative generally accepted accounting principles (“GAAP”) to be applied by nongovernmental entities. All guidance contained in the Accounting Standards Codification (“ASC”) carries an equal level of authority. Rules and interpretive releases of the Securities and Exchange Commission (“SEC”) under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. Accordingly, all other accounting literature will be deemed “non-authoritative”. ASC 105 is effective on a prospective basis for financial statements issued for interim and annual periods ending after September 15, 2009. The Company has implemented the guidance included in ASC 105 as of July 1, 2009. The implementation of this guidance changed the Company’s references to GAAP authoritative guidance but did not impact the Company’s financial position or results of operations.

In January 2010, the FASB issued Accounting Standards Update No. 2010-06 (ASU 2010-06), Fair Value Measurements and Disclosures which amends ASC Topic 820, adding new requirements for disclosures for Levels 1 and 2, separate disclosures of purchases, sales, issuances, and settlements relating to Level 3 measurements and clarification of existing fair value disclosures. ASU 2010-06 is effective for interim and annual periods beginning after December 15, 2009, except for the requirement to provide Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010 (the Company’s fiscal year 2012); early adoption is permitted. The Company is currently evaluating the impact of adopting ASU 2009-14 on its financial statements.

In January 2010 the FASB issued guidance that eliminates the concept of a “qualifying special-purpose entity” (QSPE), revises conditions for reporting a transfer of a portion of a financial asset as a sale (e.g., loan participations), clarifies the derecognition criteria, eliminates special guidance for guaranteed mortgage securitizations, and changes the initial measurement of a transferor’s interest in transferred financial assets. This guidance is effective for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after November 15, 2009. We adopted the provisions of this guidance effective January 1, 2010, which did not have a material impact on our financial statements.

In January 2010 the FASB issued guidance that revises analysis for identifying the primary beneficiary of a variable interest entity, or VIE, by replacing the previous quantitative-based analysis with a framework that is based more on qualitative judgments. The new guidance requires the primary beneficiary of a VIE to be identified as the party that both (i) has the power to direct the activities of a VIE that most significantly impact its economic performance and (ii) has an obligation to absorb losses or a right to receive benefits that could potentially be significant to the VIE. This guidance is effective for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after November 15, 2009. We adopted the provisions of this guidance effective January 1, 2010, which did not have a material impact on our financial statements.

2. **Summary of significant accounting policies**(continued)

Recently issued accounting pronouncements (continued)

In January 2010, the FASB issued guidance that expands the interim and annual disclosure requirements of fair value measurements, including the information about movement of assets between Level 1 and 2 of the three-tier fair value hierarchy established under its fair value measurement guidance. This guidance also requires separate disclosure for purchases, sales, issuances and settlements in the reconciliation for fair value measurements using significant unobservable inputs using Level 3 methodologies. Except for the detailed disclosure in the Level 3 reconciliation, which is effective for the fiscal years beginning after December 15, 2010, all the other disclosures under this guidance became effective during the six months ended June 30, 2010. We adopted the relevant provisions of this guidance effective January 1, 2010, which did not have a material impact on our financial statements.

Accounting for Uncertainty in Income Taxes

The Company adopted the provisions of FASB Accounting Standard Codification Topic 740 (ASC 740) "Income Taxes." ASC 740 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with ASC 740, and prescribes a recognition threshold and measurement process for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. ASC 740 provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The adoption of the provisions of ASC 740 did not have a material effect on the Company's financial statements.

Based on the Company's evaluation, the Company has concluded that there are no significant uncertain tax positions requiring recognition in its financial statements.

The Company is amortizing the \$520,000 cost of stock-based compensation over a period of one year on the straight line basis.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

9. **Share – based compensation expenses**

The Company has outstanding equity awards issued under its legacy equity plans and equity plans assumed as a result of previous acquisitions. While the Company maintains a number of legacy and acquired equity incentive plans that have awards outstanding, equity awards are currently made only from the 2008 Omnibus Incentive Plan as described below.

2008 Omnibus Incentive Plan

The 2008 Omnibus Incentive Plan (the “2008 Plan”) was approved by the Company’s Board of Directors on October 30, 2008 and became effective upon the approval of the Company’s stockholders on December 11, 2008. The 2008 Plan has a ten year term. The 2008 Plan reserves two million shares of common stock for issuance, subject to increase from time to time by the number of shares: (i) subject to outstanding awards granted under the Company’s prior equity compensation plans that terminate without delivery of any stock (to the extent such shares would have been available for issuance under such prior plan), and (ii) subject to awards assumed or substituted in connection with the acquisition of another company.

The 2008 Plan authorizes the issuance of awards including stock options, restricted stock units (RSUs), restricted stock, unrestricted stock, stock appreciation rights (SARs) and other equity and/or cash performance incentive awards to employees, directors, and consultants of the Company. Subject to certain restrictions, the Compensation Committee of the Board of Directors has broad discretion to establish the terms and conditions for awards under the 2008 Plan, including the number of shares, vesting conditions and the required service or performance criteria. Options and SARs have a maximum term of five years, and their exercise price may not be less than 110% of fair market value on the date of grant. Repricing of stock options and SARs is prohibited without stockholder approval. Each share subject to an award other than stock options or SARs will reduce the number of shares available for issuance under the 2008 Plan by 17,000 shares. Certain change in control transactions may cause awards granted under the 2008 Plan to vest, unless the awards are continued or substituted for in connection with the transaction. As of September 30, 2010, there were 1,983,000 shares authorized and available for issuance under the 2008 Plan.

The restricted stock activity in 2010 related to the Company’s 2008 Plan was as follows:

	Shares	Weighted Average Grant Date Price \$
Non-vested at December 31, 2009		
Granted	17,000	8.11
Vested	(8,500)	5.74
Forfeited	-	-
Non-vested at September 30, 2010	<u>8,500</u>	10.48

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

9. **Share – based compensation expenses** *(continued)*

The share option activity in 2010 related to the Company's 2008 Plan was as follows:

	<u>Number of options</u>	<u>Weighted average exercise price</u>	<u>Weighted average remaining life</u>
Balance as of January 1, 2010	-	-	-
Granted during the period	100,000	3.85	10.00
Forfeited during the period	-	-	
Balance as of September 30, 2010	<u>100,000</u>	<u>3.85</u>	<u>9.92</u>

	<u>Number of options</u>	<u>Weighted average exercise price</u>	<u>Weighted average remaining life</u>
Exercisable as of January 1, 2010	-	-	-
Exercisable during the period	33,333	3.85	10.00
Forfeited during the period	-	-	
Exercisable as of September 30, 2010	<u>33,333</u>	<u>3.85</u>	<u>9.92</u>

10. **Earning per share**

Basic earning per common share is computed by dividing income available to common shareholders by the weighted-averages number of shares of common stock outstanding during the period. Diluted earning per common share is computed by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period increased to include the number of additional shares of common stock outstanding that would have been outstanding if the potentially dilutive securities had been issued. Potentially dilutive securities include outstanding stock options, restricted shares. The dilutive effect of potential dilutive securities is reflected in diluted earning per common share by application of the treasury stock method. Under the treasury stock method, an increase in the fair market value of the Company's common stock can result in a greater dilutive effect from potentially dilutive securities.

The leasehold land is being amortized annually using the straight-line method over the lease terms of 50 years.

14. Intangible asset – Consumer battery license

	<i>At of</i>	
	<u>September 30,</u> 2010 <i>(Unaudited)</i>	<u>December 31,</u> 2009 <i>(Audited)</i>
	\$	\$
<i>Cost</i>		
Consumer battery license fee	1,000,000	1,000,000
Accumulated amortization	<u>(187,500)</u>	<u>(150,000)</u>
Net	<u>812,500</u>	<u>850,000</u>

Amortization expenses included in selling and distribution costs for the nine months ended September 30, 2010 and 2009 was \$37,500.

Shenzhen Highpower Technology Co., Ltd. (SZ Highpower), a wholly-owned subsidiary of the Company, entered into a Consumer Battery License Agreement with Ovonic Battery Company, Inc. (Ovonic), an unrelated party, dated May 14, 2004, pursuant to which SZ Highpower acquired a royalty-bearing, non-exclusive license to use certain patents owned by Ovonic to manufacture rechargeable nickel metal hydride batteries for portable consumer applications (Consumer Batteries) in the PRC, and a royalty-bearing, non-exclusive worldwide license to use certain patents owned by Ovonic to use, sell and distribute Consumer Batteries. SZ Highpower made an up-front royalty payment to Ovonic of \$50,000 in 2004.

On August 8, 2007, SZ Highpower and Ovonic amended the Consumer Battery License Agreement pursuant to which SZ Highpower agreed to pay a total of \$112,580, which was to be made in two equal payments of \$56,290, one of which was to be made within 15 days of August 8, 2007, and the other within 45 days of August 8, 2007, as royalties for its use of the licensed technology in 2004, 2005 and 2006. Both of these payments were made during 2007 and were recorded as royalty expense in prior years, which was included in selling and distribution costs in the statement of operations.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

14. Intangible asset – Consumer battery license(continued)

The Consumer Battery License Agreement also requires the Company to pay an additional up-front royalty payment of \$1,000,000 by four annual installments and an annual royalty fee based on the gross sales of consumer batteries over the term of the Consumer Battery License Agreement. Accordingly, during the year ended December 31, 2007, the Company recorded a total up-front royalty payment obligation of \$1,000,000, which was included in other payables and accrued liabilities, with the related debit recorded as an intangible asset entitled consumer battery license agreement. During the nine months ended September 30, 2010, the Company recorded a total of approximately \$269,832 as royalty expense, which was included in selling and distribution costs in the statement of operations. At September 30, 2010, accrued royalty fees payable was \$1,233,752 (see Note 19).

The Company is amortizing the \$1,000,000 cost of the Consumer Battery License Agreement over a period of 20 years on the straight line basis. The accounting for the Consumer Battery License Agreement is based on the Company's estimate of the useful life of the underlying technology, which is based on the Company's assessment of existing battery technology, current trends in the battery business, potential developments and improvements, and the Company's current business plan.

15. Investment Securities

	<i>As of</i>	
	<u>September 30,</u> 2010 <i>(Unaudited)</i>	<u>December 31,</u> 2009 <i>(Audited)</i>
	\$	\$
Investment securities - cost method	52,843	52,732
	<u>52,843</u>	<u>52,732</u>

The investments in less than twenty percent owned entities are accounted for under the cost basis.

16. Fair Value Measurements

The Company adopted FASB ASC 820, Fair Value Measurements and Disclosures ("ASC 820"), related to the Company's financial assets and liabilities. ASC 820 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles and expands disclosures about fair value measurements. ASC 820 defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also describes three levels of inputs that may be used to measure fair value:

Level 1 — quoted prices in active markets for identical assets and liabilities.

Level 2 — observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 — unobservable inputs in which there is little or no market data available, which require the reporting entity to develop its own assumptions.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

16. Fair Value Measurements (continued)

ASC 820 also provides guidance for determining the fair value of a financial asset when the market for that asset is not active, and for determining fair value when the volume and level of activity for an asset or liability have significantly decreased and includes guidance on identifying circumstances that indicate when a transaction is not orderly. The adoption of ASC 820 did not have a material impact on the Company's financial condition or results of operations.

The effective date for certain aspects of ASC 820 was deferred and are currently being evaluated by the Company. Areas impacted by the deferral relate to nonfinancial assets and liabilities that are measured at fair value, but are recognized or disclosed at fair value on a nonrecurring basis. The effects of these remaining aspects of ASC 820 are to be applied by the Company to fair value measurements prospectively beginning November 1, 2009. The adoption of the remaining aspects of ASC 820 is not expected to have a material impact on its financial condition or results of operations. See Note 6 to the consolidated financial statements in this Report on Form 10-K for additional investment information.

The following table details the fair value measurements of assets and liabilities within the three levels of the fair value hierarchy at September 30, 2010 and December 31, 2009:

	September 30, 2010 \$	Fair Value Measurements at reporting date using

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Stated in US Dollars)

17. Risk Management Activities, Including Derivative (continued)

Hedging Activities

Due to the volatility of the US Dollar to the Company's functional currency, the Company has put into place a hedging program to attempt to protect it from significant changes to the US Dollar, which would affect the value of the Company's US dollar receivables and sales. At September 30, 2010, the Company had a series of currency forwards totaling a notional amount US\$6,000,000 expiring from November 2010 to May 2011.

SZ Highpower uses foreign currencies derivative instruments to manage foreign exchange resulting from fluctuations in US Dollar to the Company's functional currency (RMB). The notional amounts of these financial instruments are based on expected cash flow from operations.

At the inception of a derivative contract, SZ Highpower historically designated the derivative as a cash flow hedge. For all derivatives designated as cash flow hedges, SZ Highpower formally documented the relationship between the derivative contract and the hedged items, as well as the risk management objective for entering into the derivative contract. To be designated as a cash flow hedge transaction, the relationship between the derivative and the hedged items must be highly effective in achieving the offset of changes in cash flows attributable to the risk both at the inception of the derivative and on an ongoing basis. SZ Highpower historically measured hedge effectiveness on a quarterly basis and hedge accounting would be discontinued prospectively if it was determined that the derivative was no longer effective in offsetting changes in the cash flows of the hedged item. Gains and losses deferred in accumulated other comprehensive income related to cash flow hedge derivatives that became ineffective remained unchanged until the related cashflow was received. If SZ Highpower determined that it was probable that a hedged forecasted transaction would not occur, deferred gains or losses on the derivative were recognized in earnings immediately.

Derivatives, historically, were recorded on the balance sheet at fair value and changes in the fair value of derivatives were recorded each period in net income or other comprehensive income, depending on whether a derivative was designated as part of a hedge transaction and, if it was, depending on the type of hedge transaction. SZ Highpower's derivatives historically consisted primarily of cash flow hedge transactions in which SZ Highpower was hedging the variability of cash flows related to a forecasted transaction. Period to period changes in the fair value of derivative instruments designated as cash flow hedges were reported in other comprehensive income and reclassified to net income in the periods in which the contracts are settled. The ineffective portions of the cash flow hedges were reflected in net income as an increase or decrease to other income (expense). Gains and losses on derivative instruments that did not qualify for hedge accounting were also recorded as an increase or decrease to other income (expense), in the period in which they occurred. The resulting cash flows from derivatives were reported as cash flows from operating activities.

The cost of the effective portion of the cash flow hedges was \$15,931 and \$Nil for the nine months ended September 30, 2010 and 2009.

HIGHPOWER INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

18. Change in fair value of share warrants

On June 19, 2008, the Company issued to WestPark Capital, Inc. warrants to purchase 52,500 shares of common stock at an exercise price of \$3.90 per share in connection with the initial public offering. The warrants have a term of five years and are exercisable no sooner than one year and no later than five years from the date of issuance.

The fair value of the warrants at June 19, 2008, the date of issue is \$276,000. The fair value of the warrants is appraised by an independent qualified valuer.

On December 16, 2009, a warrant holder exercised 5,000 shares of the warrants via a cashless exercise. The Company issued 2,510 shares of common stock upon the exercise of the warrants at no consideration. At September 30, 2010, warrants to purchase 47,500 shares of common stock were still outstanding.

19. Other payables and accrued liabilities

20. **Bank borrowings**

	<i>At of</i>	
	<u>September 30,</u>	<u>December 31,</u>
	2010	2009
	<i>(Unaudited)</i>	<i>(Unaudited)</i>
	\$	\$
Secured:		
Repayable within one year		
Short term bank loans	1,983,507	2,929,551
Other trade related bank loans	<u>19,721,386</u>	<u>11,858,163</u>
	<u>21,704,893</u>	<u>14,787,714</u>

As of September 30, 2010, the above bank borrowings were secured by the following:

- (a) charge over bank deposits of \$ which is included in restricted cash on the Balance sheet;
- (b) personal guarantee executed by the directors of the Company;
- (c) the legal charge over leasehold land with carrying amount \$2,978,606 (see Note 13); and
- (d) other financial covenant

The interest rates of trade related bank loans were at bank's prime lending rate per annum with various maturity dates. The rates at September 30, 2010 ranged from 4.9% to 5.1%.

21. **Pension plans**

For employees in PRC, the Company contributes on a monthly basis to various defined contribution plans organized by the relevant municipal and provincial government in the PRC based on certain percentage of the relevant employees' monthly salaries. The municipal and provincial governments undertake to assume the retirement benefit obligations payable to all existing and future retired employees under these plans and the Company has no further constructive obligation for post-retirement benefits beyond the contributions made. Contributions to these plans are expenses as incurred.

The assets of the schemes are controlled by trustees and held separately from those of the Company. Total pension cost was \$501,955 and \$365,348 for the nine months ended September 30, 2010 and 2009, respectively.

HIGHPOWER INTERNATIONAL, INC AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Stated in US Dollars)

22. **Commitments and contingencies**

Operating leases commitments

The Company leases factory and office premises under various non-cancelable operating lease agreements that expire at various dates through years 2010 to 2011, with an option to renew the lease. All leases are on a fixed repayment basis. None of the leases includes contingent rentals. Minimum future commitments under these agreements payable as of September 30, 2010 are as follows:

Period ending September 30,	\$
2010	440,106
2011	<u>258,983</u>
	<u>699,089</u>

Rent expenses for the nine months ended September 30, 2010 and 2009 were \$462,232 and \$715,663, respectively.

23. **Segment Information**

The Company uses the “management approach” in determining reportable operating segments. The management approach considers the internal organization and reporting used by the Company’s chief operating decision maker for making operating decisions and assessing performance as the source for determining the Company’s reportable segments. Management, including the chief operating decision maker, reviews operating results solely by monthly revenue (but not by sub-product type or geographic area) and operating results of the Company and, as such, the Company has determined that the Company has one operating segment as defined by FASB Accounting Standard Codification Topic 280 (ASC 280) “Segment Reporting”.

All long-lived assets of the Company are located in the PRC. Geographic information about the revenues and accounts based on the location of the Company’s customers is set out as follows:

	<u>Nine months ended September 30,</u>

24. Subsequent Events

The Company has evaluated significant events and transactions that occurred from October 1, 2010 through the date of this report and has determined that there were no events or transactions other than those disclosed in this report, if any, that would require recognition or disclosure in its Unaudited Condensed Consolidated Financial Statements for the quarterly period ended September 30, 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion relates to a discussion of the financial condition and results of operations of Highpower International, Inc. (the "Company") and its wholly-owned subsidiary Hong Kong Highpower Technology Co., Ltd. (referred to herein as "HKHT"), and HKHT's wholly-owned subsidiaries Shenzhen Highpower Technology Co., Ltd. ("Shenzhen Highpower") and Sure Power Technology (Shenzhen) Co., Ltd. ("Sure Power"). HKHT's other subsidiary, HZ Highpower Technology Co. ("HZ Highpower") and Shenzhen Highpower's wholly-owned subsidiary, Ganzhou Highpower Technology Co., Ltd. ("GZ Highpower"), have not yet commenced operations.

Forward-Looking Statements

This management's discussion and analysis of financial condition and results of operations should be read in conjunction with our unaudited consolidated financial statements and the related notes that are included in this Quarterly Report and the audited consolidated financial statements and related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" contained in our Annual Report on Form 10-K for the year ended December 31, 2009.

This Quarterly Report contains forward-looking statements that involve substantial risks and uncertainties. All statements other than historical facts contained in this report, including statements regarding our future financial position, capital expenditures, cash flows, business strategy and plans and objectives of management for future operations, are forward-looking statements. The words "anticipated," "believe," "expect," "plan," "intend," "seek," "estimate," "project," "could," "may," and similar expressions are intended to identify forward-looking statements. Such statements reflect our management's current views with respect to future events and financial performance and involve risks and uncertainties, including, without limitation, the current economic downturn adversely affecting demand for our products; fluctuations in the cost of raw materials; our dependence on, or inability to attract additional, major customers for a significant portion of our net sales; our ability to increase manufacturing capabilities to satisfy orders from new customers; changes in the laws of the PRC that affect our operations; our ability to complete construction at our new manufacturing facility on time; our ability to control operating expenses and costs related to the construction of our new manufacturing facility; the devaluation of the U.S. Dollar relative to the Renminbi; our dependence on the growth in demand for portable electronic devices and the success of manufacturers of the end applications that use our battery products; our responsiveness to competitive market conditions; our ability to successfully manufacture Li-ion batteries in the time frame and amounts expected; the market acceptance of our Li-ion products; changes in foreign, political, social, business and economic conditions that affect our production capabilities or demand for our products; and various other matters, many of which are beyond our control. Actual results may vary materially and adversely from those anticipated, believed, estimated or otherwise indicated should one or more of these risks or uncertainties occur or if any of the risks or uncertainties described in elsewhere in this report or in the "Risk Factors" section of our 2009 Annual Report occur. Consequently, all of the forward-looking statements made in this filing are qualified by these cautionary statements and there can be no assurance of the actual results or developments.

Overview

We were incorporated in the state of Delaware on January 3, 2006. We were originally organized as a "blank check" shell company to investigate and acquire a target company or business seeking the perceived advantages of being a publicly held corporation. On November 2, 2007, we closed a share exchange transaction, pursuant to which we (i) became the 100% parent of HKHT and its wholly-owned subsidiary, Shenzhen Highpower, (ii) assumed the operations of HKHT and its subsidiary and (iii) changed our name to Hong Kong Highpower Technology, Inc. On October 20, 2010 we changed our name to Highpower International, Inc.

HKHT was incorporated in Hong Kong in 2003, under the Companies Ordinance of Hong Kong. Shenzhen Highpower was founded in 2001. HKHT formed HZ Highpower and Springpower in 2008. Shenzhen Highpower formed GZ Highpower in September 2010. Neither HZ Highpower nor GZ Highpower has not yet commenced business operations.

Through Shenzhen Highpower, we manufacture Nickel Metal Hydride ("Ni-MH") batteries for both consumer and industrial applications. We have developed significant expertise in Ni-MH battery technology and large-scale manufacturing that enables us to improve the quality of our battery products, reduce costs, and keep pace with evolving industry standards. In 2008, we commenced manufacturing two lines of Lithium-Ion ("Li-ion") and Lithium polymer rechargeable batteries through Spring Power for higher-end, high-performance applications, such as laptops, digital cameras and wireless communication products. Our automated machinery allows us to process key aspects of the manufacturing process to ensure high uniformity and precision, while leaving the non-key aspects of the manufacturing process to manual labor.

We employ a broad network of salespersons in China and Hong Kong, which target key customers by arranging in-person sales presentations and providing post-sale services. The sales staff works with our customers to better address customers' needs.

We recently began a new materials business in which we buy and resell certain raw materials related to our battery manufacturing operations. This new materials business generates revenue and income and helps us understand our raw material supply chain, control our raw material costs and ensure that we have a steady supply of raw materials for our battery manufacturing operations.

Critical Accounting Policies and Estimates

The SEC defines critical accounting policies as those that are, in management's view, most important to the portrayal of our financial condition and results of operations and those that require significant judgments and estimates.

The preparation of these condensed consolidated financial statements requires our management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, as well as the disclosure of contingent assets and liabilities at the date of our financial statements. We base our estimates on historical experience, actuarial valuations and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Some of those judgments can be subjective and complex and, consequently, actual results may differ from these estimates under different assumptions or conditions. While for any given estimate or assumption made by our management there may be other estimates or assumptions that are reasonable, we believe that, given the current facts and circumstances, it is unlikely that applying any such other reasonable estimate or assumption would materially impact the financial statements. The accounting principles we utilized in preparing our consolidated financial statements conform in all material respects to generally accepted accounting principles in the United States of America.

Use of Estimates. In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the dates of the financial statements, as well as the reported amounts of revenues and expenses during the reporting periods. These accounts and estimates include, but are not limited to, the valuation of accounts receivable, inventories, deferred income taxes and the estimation on useful lives of plant and equipment. Actual results could differ from those estimates.

Accounts Receivable. Accounts receivable are stated at original amount less allowance made for doubtful receivables, if any, based on a review of all outstanding amounts at the period end. An allowance is also made when there is objective evidence that we will not be able to collect all amounts due according to original terms of receivables. Bad debts are written off when identified. We extend unsecured credit to customers in the normal course of business and believe all accounts receivable in excess of the allowances for doubtful receivables to be fully collectible. We do not accrue interest on trade accounts receivable.

Revenue Recognition. We recognize revenue when the goods are delivered and the customer takes ownership and assumes risk of loss, collection of the relevant receivable is probable, persuasive evidence of an arrangement exists and the sales price is fixed or determinable. Sales of goods represent the invoiced value of goods, net of sales returns, trade discount and allowances.

We do not have arrangements for returns from customers and do not have any future obligations directly or indirectly related to product resales by the customer. We have no incentive programs.

Inventories. Inventories are stated at the lower of cost or market value. Cost is determined on a weighted average basis and includes purchase costs, direct labor and factory overheads. In assessing the ultimate realization of inventories, management makes judgments as to future demand requirements compared to current or committed inventory levels. Our reserve requirements generally increase based on management's projected demand requirements, and decrease due to market conditions and product life cycle changes. Our production process results in a minor amount of waste materials. We do not record a value for the waste in our cost accounting. We record proceeds on an as realized basis, when the waste is sold. We offset the proceeds from the sales of waste materials as a reduction of production costs.

Income Taxes. We use the asset and liability method of accounting for income taxes pursuant to SFAS No. 109, "Accounting for Income Taxes." Under the asset and liability method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and loss carry forwards and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. We have also adopted FIN 48, "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109."

Foreign Currency Translation. Our functional currency is the Renminbi (“RMB”). We maintain our financial statements in the functional currency. Monetary assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at rates of exchange prevailing at the balance sheet dates. Transactions denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transaction. Exchange gains or losses arising from foreign currency transactions are included in the determination of net income for the respective periods.

For financial reporting purposes, our financial statements, which are prepared using the functional currency, are then translated into United States dollars. Assets and liabilities are translated at the exchange rates at the balance sheet dates and revenue and expenses are translated at the average exchange rates and stockholders’ equity is translated at historical exchange rates. Any translation adjustments resulting are not included in determining net income but are included in foreign exchange adjustment in other comprehensive income, a component of stockholders’ equity.

The RMB is not freely convertible into foreign currency and all foreign exchange transactions must take place through authorized institutions. No representation is made that RMB amounts could have been, or could be, converted into U.S. Dollars at rates used in translation.

Results of Operations

Three Months Ended September 30, 2010 and 2009

Net sales for the three months ended September 30, 2010 were \$27.8 million compared to \$21.1 million for the three months ended September 30, 2009, an increase of 31.9%. This increase was largely due to a 20% increase in the average selling price of our battery units, partially offset by a 0.5% decrease in the number of battery units sold. The 20% increase in the average selling price of our battery units was due to an increase in the average cost of nickel during the three months ended September 30, 2010 compared to the comparable period in 2009. The 0.5% decrease in the number of battery units sold was due to decreased orders from our customers. Net sales during the three months ended September 30, 2010 also included \$2,705,905 in sales from our New Material business and \$15,147 from the sale of battery seconds (waster materials).

Cost of sales consists of the cost of nickel and other materials. Costs of sales were \$21.9 million for the three months ended September 30, 2010 as compared to \$15.8 million for the comparable period in 2009. As a percentage of net sales, cost of sales increased to 78.9% for the three months ended September 30, 2010 compared to 75.2% for the comparable period in 2009. This increase was attributable to a 22% increase in the average per unit cost of goods sold during three months ended September 30, 2010 as compared to the comparable period in 2009, which was offset by a 20% increase in the average selling price of our battery units during the three months ended September 30, 2010 over three months ended September 30, 2009. The 22% increase in the average per unit cost of goods sold resulted from a 19% increase in the average cost of nickel during the three months ended September 30, 2010 compared to the comparable period in 2009.

Gross profit for the three months ended September 30, 2010 was \$5.9 million, or 21.1% of net sales, compared to \$5.2 million, or 24.8% of net sales, for the comparable period in 2009. Management considers gross profit to be a key performance indicator in managing our business. Gross profit margins are usually a factor of cost of sales, product mix and demand for product. The decrease in our gross profit margin for the three months ended September 30, 2010 is primarily due to a 22% increase in the average per unit cost of goods sold during three months ended September 30, 2010 as compared to the comparable period in 2009.

To cope with pressure on our gross margins we intend to control production costs by preparing budgets for each department and comparing actual costs with our budgeted figures monthly and quarterly. Additionally, we have reorganized the Company’s production structure and have focused more attention on employee training to enhance efficiency. We also intend to expand our market share by investing in greater promotion of our products in regions such as the U.S., Russia, Europe and India, and by expanding our sales team with more experienced sales personnel. We have also begun production of a line of Li-ion batteries to complement our current Ni-MH battery products so that we are less vulnerable to price increases in nickel. We intend to expand production of our Li-ion battery products in the future. Our current monthly Li-ion battery production increased by 20% during three months ended September 30, 2010 as compared to the comparable period in 2009.

Selling and distribution costs were \$1.1 million for the three months ended September 30, 2010 compared to \$767,000 million for the comparable period in 2009. The increase was primarily due to the expansion of our salesforce.

General and administrative costs were \$2.6 million, or 9.5% of net sales, for the three months ended September 30, 2010, compared to \$1.5 million, or 7.0% of net sales, for the comparable period in 2009. Management considers these expenses as a percentage of net sales to be a key performance indicator in managing our business. The increase as a percentage of net sales was primarily due to increased labor costs and research and development expenses. Labor and personnel costs increased \$1,089,479 for the three months ended September 30, 2010 as compared to the comparable period in 2009 due to the expansion of our workforce to expand production. Research and development expenses increased \$156,869 for the three months ended September 30, 2010 as compared to the comparable period in 2009 due to our increased commitment to advance our research and development activities.

We experienced losses on the exchange rate difference between the U.S. Dollar and the RMB of \$329,000 and \$7,000, respectively, in the three months ended September 30, 2010 and 2009. The increase in the losses on exchange rate was due to the devaluation of the U.S. Dollar relative to the RMB over the respective periods. Although our sales contracts do not automatically adjust to reflect changes in exchange rates, to cope with devaluation of the U.S. Dollar relative to the RMB, each time that we enter into new sales contracts with new or existing customers we adjust the selling price of batteries in anticipation of an increase, and to make up for any potential change, in the exchange rate between the two currencies.

Interest expense was \$90,000 for the three months ended September 30, 2010, as compared to \$199,000 for the comparable period in 2009. The decrease was primarily due to lower interest rates. We increased our borrowings by approximately \$4.0 million in the three months ended September 30, 2010 as compared to the three months ended September 30, 2009. Further increases in borrowing rates would further increase our interest expense, which would have a negative effect on our results of operations.

Other income from operations, which consists of bank interest income, exchange gains and losses and sundry income, was \$83,000, for the three months ended September 30, 2010, as compared to \$290,000 for the three months ended September 30, 2009, a decrease of 247%. The decrease was due to a decrease in funds from a government sponsor of \$201,000 and a \$21,000 decrease in sundry income, partially offset by a \$17,000 increase in bank interest income and a \$1,000 gain on a foreign exchange contract.

We had other expenses related to foreign exchange contracts of \$53,000 in the three months ended September 30, 2009. We had no such expenses in the three months ended September 30, 2010.

During the three months ended September 30, 2010, we recorded a provision for income taxes of \$280,000, as compared to \$530,000 for the comparable period in 2009. The decrease was a result of a decrease in our net taxable income.

Net income for the three months ended September 30, 2010 was \$1.4 million, compared to net income of \$2.4 million for the comparable period in 2009.

Nine months Ended September 30, 2010 and 2009

Net sales for the nine months ended September 30, 2010 were \$77.0 million compared to \$47.8 million for the nine months ended September 30, 2009, an increase of 61.0%. This increase was largely due to a 30% increase in the number of battery units sold and a 7.5% increase in the average selling price of our battery units. The 30% increase in the number of battery units sold was due to increased orders from our customers. The 7.5% increase in the average selling price of our battery units was due to an increase in the average cost of nickel during the nine months ended September 30, 2010 compared to the comparable period in 2009. Net sales during the nine months ended September 30, 2010 also included \$10,338,039 in sales from our New Material Business and \$53,877 from the sale of battery seconds (waster materials). Sales of battery seconds (waste materials) decreased from \$132,662 during the nine months ended September 30, 2009 to \$53,877 during the nine months ended September 30, 2010.

Cost of sales consists of the cost of nickel and other materials. Costs of sales were \$61.5 million million the nine months ended September 30, 2010 as compared to \$37.1 million for the comparable period in 2009. As a percentage of net sales, cost of sales increased to 79.8% for the nine months ended September 30, 2010 compared to 77.6% for the comparable period in 2009. This increase was attributable to a 9.5 % increase in the average per unit cost of goods sold during nine months ended September 30, 2010 as compared to the comparable period in 2009, which was offset by a 7.5% increase in the average selling price of our battery units during the nine months ended September 30, 2010 over nine months ended September 30, 2009. The 9.5% increase in the average per unit cost of goods sold resulted from a 40% increase in the average cost of nickel during the nine months ended September 30, 2010 compared to the comparable period in 2009.

Gross profit for the nine months ended September 30, 2010 was \$15.5 million, or 20.2% of net sales, compared to \$10.7 million, or 22.4% of net sales, for the comparable period in 2009. Management considers gross profit to be a key performance indicator in managing our business. Gross profit margins are usually a factor of cost of sales, product mix and demand for product. The decrease in our gross profit margin for the nine months ended September 30, 2010 is primarily due to a 9.5% increase in the average per unit cost of goods sold during nine months ended September 30, 2010 as compared to the comparable period in 2009.

To cope with pressure on our gross margins we intend to control production costs by preparing budgets for each department and comparing actual costs with our budgeted figures monthly and quarterly. Additionally, we have reorganized the Company's production structure and have focused more attention on employee training to enhance efficiency. We also intend to expand our market share by investing in greater promotion of our products in regions such as the U.S., Russia, Europe and India, and by expanding our sales team with more experienced sales personnel. We have also begun production of a line of Li-ion batteries to complement our current Ni-MH battery products so that we are less vulnerable to price increases in nickel. We intend to expand production of our Li-ion battery products in the future. Our current monthly Li-ion battery production increased by 120% during nine months ended September 30, 2010 as compared to the comparable period in 2009.

Selling and distribution costs were \$3.0 million for the nine months ended September 30, 2010 compared to \$1.9 million for the comparable period in 2009. The increase was primarily due to the expansion of our salesforce.

General and administrative costs were \$6.2 million, or 8.1% of net sales, for the nine months ended September 30, 2010, compared to \$3.6 million, or 7.6% of net sales, for the comparable period in 2009. Management considers these expenses as a percentage of net sales to be a key performance indicator in managing our business. The increase as a percentage of net sales was primarily due to increased labor costs and research and development expenses. Labor and personnel costs increased \$1,623,545 for the nine months ended September 30, 2010 as compared to the comparable period in 2009 due to the expansion of our workforce to expand production. Research and development expenses increased \$476,822 for the nine months ended September 30, 2010 as compared to the comparable period in 2009 due to our increased commitment to advance our research and development activities.

We experienced losses on the exchange rate difference between the U.S. Dollar and the RMB of \$481,000 and \$62,000, respectively, in the nine months ended September 30, 2010 and 2009. The increase in the losses on exchange rate was due to the devaluation of the U.S. Dollar relative to the RMB over the respective periods. Although our sales contracts do not automatically adjust to reflect changes in exchange rates, to cope with devaluation of the U.S. Dollar relative to the RMB, each time that we enter into new sales contracts with new or existing customers we adjust the selling price of batteries in anticipation of an increase, and to make up for any potential change, in the exchange rate between the two currencies.

Interest expense was \$257,000 for the nine months ended September 30, 2010, as compared to \$280,000 for the comparable period in 2009. The decrease was primarily due to lower interest rates. We increased our borrowings by approximately \$5.0 million in the nine months ended September 30, 2010 as compared to the nine months ended September 30, 2009. Further increases in borrowing rates would further increase our interest expense, which would have a negative effect on our results of operations.

Other income from operations, which consists of bank interest income, exchange gains and losses and sundry income, was \$287,000, for the nine months ended September 30, 2010, as compared to \$378,000 for the nine months ended September 30, 2009, a decrease of \$91,000. The decrease was due to a decrease in funds received from a government sponsor of \$151,000, partially offset by a \$24,000 increase in bank interest income, a \$4,000 gain from a foreign exchange contract and a \$21,000 increase in sundry income during the nine months ended September 30, 2010 as compared to the comparable period in 2009.

We had other expenses related to foreign exchange contracts of \$224,000 in the nine months ended September 30, 2009. We had no such expenses in the nine months ended September 30, 2010.

During the nine months ended September 30, 2010, we recorded a provision for income taxes of \$1.0 million, as compared to \$919,000 for the comparable period in 2009. The increase was a result of an increase in our net taxable income.

Net income for the nine months ended September 30, 2010 was \$4.6 million, compared to net income of \$3.8 million for the comparable period in 2009.

Liquidity and Capital Resources

We had cash and cash equivalents of approximately \$5.4 million as of September 30, 2010, as compared to \$3.0 million as of December 31, 2009. Our funds are kept in financial institutions located in the PRC, which do not provide insurance for amounts on deposit. Moreover, we are subject to the regulations of the PRC which restrict the transfer of cash from the PRC, except under certain specific circumstances. Accordingly, such funds may not be readily available to us to satisfy obligations which have been incurred outside the PRC.

To provide liquidity and flexibility in funding our operations, we borrow amounts under bank facilities and other external sources of financing. As of September 30, 2010, we had in place general banking facilities with five financial institutions aggregating \$35.0 million. The maturity of these facilities is generally up to one year. The facilities are subject to annual review and approval. These banking facilities are guaranteed by us and some of our shareholders, including Dang Yu Pan, Wen Liang Li and Wen Wei Ma, and contain customary affirmative and negative covenants for secured credit facilities of this type. However, these covenants do not have any impact on our ability to undertake additional debt or equity financing. Interest rates are generally based on the banks' reference lending rates. No significant commitment fees are required to be paid for the banking facilities. As of September 30, 2010, we had utilized approximately \$21.7 million under such general credit facilities and had available unused credit facilities of \$13.3 million.

For the nine months ended September 30, 2010, net cash provided by operating activities was approximately \$1.7 million, as compared to \$13.9 million for the comparable period in 2009. The decrease in net cash provided by operating activities is primarily attributable to an increase in accounts receivable and an increase in inventories.

Net cash used in investing activities was \$4.4 million for the nine months ended September 30, 2010 compared to \$2.8 million for the comparable period in 2009. The increase of cash used in investing activities was primarily attributable to an increase in the acquisition of plant and equipment over the respective periods.

Net cash provided by financing activities was \$4.8 million during the nine months ended September 30, 2010, as compared to net cash used in financing activities of \$8.1 million for the nine months ended September 30, 2009. The increase in net cash provided by financing activities was attributable to a decrease in the repayment of other secured loans.

For the nine months ended September 30, 2010, our inventory turnover was 5.14 times, as compared to 6.7 times at September 30, 2009. The average days outstanding of our accounts receivable at September 30, 2010 were 70 days, as compared to 62 days at September 30, 2009. Inventory turnover and average days outstanding are key operating measures that management relies on to monitor our business. In the next 12 months, we expect to expand our research, development and manufacturing of lithium-based batteries and anticipate additional capital expenditures.

We are required to contribute a portion of our employees' total salaries to the Chinese government's social insurance funds, including medical insurance, unemployment insurance and job injuries insurance, and a housing assistance fund, in accordance with relevant regulations. Total contributions to the funds were approximately \$233,759 and \$107,120 in the three months ended September 30, 2010 and 2009, respectively and \$501,955 and \$365,348 in the nine months ended September 30, 2010 and 2009, respectively. We expect the amount of our contribution to the government's social insurance funds to increase in the future as we expand our workforce and operations.

Based upon our present plans, we believe that cash on hand, cash flow from operations and funds available under our bank facilities will be sufficient to fund our capital needs for the next 12 months. However, our ability to maintain sufficient liquidity depends partially on our ability to achieve anticipated levels of revenue, while continuing to control costs. If we did not have sufficient available cash, we would have to seek additional debt or equity financing through other external sources, which may not be available on acceptable terms, or at all. Failure to maintain financing arrangements on acceptable terms would have a material adverse effect on our business, results of operations and financial condition.

The use of working capital is primarily for the maintenance of our accounts receivable and inventory. We provide our major customers with payment terms ranging from 30 to 75 days. Additionally, our production lead time is approximately 30 to 40 days, from the inspection of incoming materials, to production, testing and packaging. We need to keep a large supply of raw materials and work in process and finished goods inventory on hand to ensure timely delivery of our products to our customers. We use two methods to support our working capital needs: (1) paying our suppliers under payment terms ranging from 30 to 60 days; and (2) using short-term bank loans. We use our accounts receivable as collateral for our loans. Upon receiving payment for our accounts receivable, we pay our short-term loans. Our working capital management practices are designed to ensure that we maintain sufficient working capital.

Recent Accounting Pronouncements

In January 2010, the FASB issued Accounting Standards Update No. 2010-06 (ASU 2010-06), Fair Value Measurements and Disclosures which amends ASC Topic 820, adding new requirements for disclosures for Levels 1 and 2, separate disclosures of purchases, sales, issuances, and settlements relating to Level 3 measurements and clarification of existing fair value disclosures. ASU 2010-06 is effective for interim and annual periods beginning after December 15, 2009, except for the requirement to provide Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010 (the Company's fiscal year 2012); early adoption is permitted. The Company is currently evaluating the impact of adopting ASU 2009-14 on its financial statements.

In January 2010 the FASB issued guidance that eliminates the concept of a "qualifying special-purpose entity" (QSPE), revises conditions for reporting a transfer of a portion of a financial asset as a sale (e.g., loan participations), clarifies the derecognition criteria, eliminates special guidance for guaranteed mortgage securitizations, and changes the initial measurement of a transferor's interest in transferred financial assets. This guidance is effective for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after November 15, 2009. We adopted the provisions of this guidance effective January 1, 2010, which did not have a material impact on our financial statements.

In January 2010 the FASB issued guidance that revises analysis for identifying the primary beneficiary of a variable interest entity, or VIE, by replacing the previous quantitative-based analysis with a framework that is based more on qualitative judgments. The new guidance requires the primary beneficiary of a VIE to be identified as the party that both (i) has the power to direct the activities of a VIE that most significantly impact its economic performance and (ii) has an obligation to absorb losses or a right to receive benefits that could potentially be significant to the VIE. This guidance is effective for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after November 15, 2009. We adopted the provisions of this guidance effective January 1, 2010, which did not have a material impact on our financial statements.

In January 2010, the FASB issued guidance that expands the interim and annual disclosure requirements of fair value measurements, including the information about movement of assets between Level 1 and 2 of the three-tier fair value hierarchy established under its fair value measurement guidance. This guidance also requires separate disclosure for purchases, sales, issuances and settlements in the reconciliation for fair value measurements using significant unobservable inputs using Level 3 methodologies. Except for the detailed disclosure in the Level 3 reconciliation, which is effective for the fiscal years beginning after December 15, 2010, all the other disclosures under this guidance became effective during the six months ended June 30, 2010. We adopted the relevant provisions of this guidance effective January 1, 2010, which did not have a material impact on our financial statements.

ASC 805, Business Combinations (“ASC 805”) (formerly included under Statement of Financial Accounting Standards No. 141 (revised 2007), Business Combinations) contains guidance that was issued by the FASB in December 2007. It requires the acquiring entity in a business combination to recognize all assets acquired and liabilities assumed in a transaction at the acquisition-date fair value, with certain exceptions. Additionally, the guidance requires changes to the accounting treatment of acquisition related items, including, among other items, transaction costs, contingent consideration, restructuring costs, indemnification assets and tax benefits. ASC 805 also provides for a substantial number of new disclosure requirements. ASC 805 also contains guidance that was formerly issued as FSP FAS 141(R)-1, Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies which was intended to provide additional guidance clarifying application issues regarding initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. ASC 805 was effective for business combinations initiated on or after the first annual reporting period beginning after December 15, 2008. The Company implemented this guidance effective January 1, 2009. Implementing this guidance did not have an effect on the Company’s financial position or results of operations; however it will likely have an impact on the Company’s accounting for future business combinations, but the effect is dependent upon acquisitions, if any, that are made in the future.

ASC 855, Subsequent Events (“ASC 855”) (formerly Statement of Financial Accounting Standards No. 165, Subsequent Events) includes guidance that was issued by the FASB in May 2009, and is consistent with current auditing standards in defining a subsequent event. Additionally, the guidance provides for disclosure regarding the existence and timing of a company’s evaluation of its subsequent events. ASC 855 defines two types of subsequent events, “recognized” and “non-recognized”. Recognized subsequent events provide additional evidence about conditions that existed at the date of the balance sheet and are required to be reflected in the financial statements. Non-recognized subsequent events provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date and, therefore, are not required to be reflected in the financial statements. However, certain non-recognized subsequent events may require disclosure to prevent the financial statements from being misleading. This guidance was effective prospectively for interim or annual financial periods ending after June 15, 2009. The Company implemented the guidance included in ASC 855 as of April 1, 2009. The effect of implementing this guidance was not material to the Company’s financial position or results of operations.

In August 2009, the FASB issued Accounting Standards Update (“ASU”) 2009-05, which amends ASC Topic 820, Measuring Liabilities at Fair Value, which provides additional guidance on the measurement of liabilities at fair value. These amended standards clarify that in circumstances in which a quoted price in an active market for the identical liability is not available, we are required to use the quoted price of the identical liability when traded as an asset, quoted prices for similar liabilities, or quoted prices for similar liabilities when traded as assets. If these quoted prices are not available, we are required to use another valuation technique, such as an income approach or a market approach. These amended standards are effective for us beginning in the fourth quarter of fiscal year 2009. There was no material impact upon the adoption of this standard on the Company’s consolidated financial statements.

In September 2009, the FASB issued ASU 2009-06, Income Taxes (Topic 740), “Implementation Guidance on Accounting for Uncertainty in Income Taxes and Disclosure Amendments for Nonpublic Entities”, which provides implementation guidance on accounting for uncertainty in income taxes, as well as eliminates certain disclosure requirements for nonpublic entities. For entities that are currently applying the standards for accounting for uncertainty in income taxes, this update shall be effective for interim and annual periods ending after September 15, 2009. For those entities that have deferred the application of accounting for uncertainty in income taxes in accordance with paragraph 740-10-65-1(e), this update shall be effective upon adoption of those standards. The adoption of this standard is not expected to have an impact on the Company’s consolidated financial position and results of operations since this accounting standard update provides only implementation and disclosure amendments.

In September 2009, the FASB has published ASU 2009-12, “Fair Value Measurements and Disclosures (Topic 820) - Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)”. This ASU amends Subtopic 820-10, “Fair Value Measurements and Disclosures – Overall”, to permit a reporting entity to measure the fair value of certain investments on the basis of the net asset value per share of the investment (or its equivalent). This ASU also requires new disclosures, by major category of investments including the attributes of investments within the scope of this amendment to the Codification. The guidance in this update is effective for interim and annual periods ending after December 15, 2009. Early application is permitted. The Company is in the process of evaluating the impact of this standard on its consolidated financial position and results of operations.

In October 2009, the FASB has published ASU 2009-13, "Revenue Recognition (Topic 605)-Multiple Deliverable Revenue Arrangements", which addresses the accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. Specifically, this guidance amends the criteria in Subtopic 605-25, "Revenue Recognition-Multiple-Element Arrangements", for separating consideration in multiple-deliverable arrangements. This guidance establishes a selling price hierarchy for determining the selling price of a deliverable, which is based on: (a) vendor-specific objective evidence; (b) third-party evidence; or (c) estimates. This guidance also eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method and also requires expanded disclosures. The guidance in this update is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position and results of operations.

ASC 105, Generally Accepted Accounting Principles ("ASC 105") (formerly SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162), reorganized by topic existing accounting and reporting guidance issued by the Financial Accounting Standards Board ("FASB") into a single source of authoritative generally accepted accounting principles ("GAAP") to be applied by nongovernmental entities. All guidance contained in the Accounting Standards Codification ("ASC") carries an equal level of authority. Rules and interpretive releases of the Securities and Exchange Commission ("SEC") under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. Accordingly, all other accounting literature will be deemed "non-authoritative". ASC 105 is effective on a prospective basis for financial statements issued for interim and annual periods ending after September 15, 2009. The Company has implemented the guidance included in ASC 105 as of July 1, 2009. The implementation of this guidance changed the Company's references to GAAP authoritative guidance but did not impact the Company's financial position or results of operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Credit Risk

We are exposed to credit risk from our cash at bank, fixed deposits and contract receivables. The credit risk on cash at bank and fixed deposits is limited because the counterparts are recognized financial institutions. Contract receivables are subject to credit evaluations. We periodically record a provision for doubtful collections based on an evaluation of the collectibility of contract receivables by assessing, among other factors, the customer's willingness or ability to pay, repayment history, general economic conditions and our ongoing relationship with the customers.

Foreign Currency and Exchange Risk

The Company maintains its financial statements in the functional currency of Renminbi ("RMB"). Substantially all of our operations are conducted in the PRC and we pay the majority of our expenses in RMB. Approximately 75% of our sales are made in U.S. Dollars. During the nine months ended September 30, 2010, the exchange rate of the RMB to the U.S. Dollar increased approximately 1.9% from the level at the end of December 31, 2009. This fluctuation resulted in a slight increase in our material costs during the nine months ended September 30, 2010. A future appreciation of the RMB against the U.S. Dollar would increase our costs when translated into U.S. Dollars and could adversely affect our margins unless we make sufficient offsetting sales. Conversion of RMB into foreign currencies is regulated by the People's Bank of China through a unified floating exchange rate system. Although the PRC government has stated its intention to support the value of the RMB, there can be no assurance that such exchange rate will not continue to appreciate significantly against the U.S. Dollar. Exchange rate fluctuations may also affect the value, in U.S. Dollar terms, of our net assets. In addition, the RMB is not freely convertible into foreign currency and all foreign exchange transactions must take place through authorized institutions. Due to the volatility of the US Dollar to our functional currency the Company put into place in 2008 a hedging program to attempt to protect it from significant changes to the US Dollar which affect the value of its US dollar receivables and sales. At September 30, 2010, the Company had a series of currency forwards totaling a notional amount US\$6,000,000 expiring from November 2010 to May 2011. The terms of these derivative contracts are generally for 12 months or less. Changes in the fair value of these derivative contracts are recorded in earnings to offset the impact of foreign currency transaction gains and losses. We experienced a \$4,189 gain in the value of currency forwards in the nine months ended September 30, 2010 as compared to a \$223,604 loss on currency forwards during the comparable period in 2009.

Country Risk

The substantial portion of our business, assets and operations are located and conducted in Hong Kong and China. While these economies have experienced significant growth in the past twenty years, growth has been uneven, both geographically and among various sectors of the economy. The Chinese government has implemented various measures to encourage economic growth and guide the allocation of resources. Some of these measures benefit the overall economy of Hong Kong and China, but may also have a negative effect on us. For example, our operating results and financial condition may be adversely affected by government control over capital investments or changes in tax regulations applicable to us. If there are any changes in any policies by the Chinese government and our business is negatively affected as a result, then our financial results, including our ability to generate revenues and profits, will also be negatively affected.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures, which are designed to ensure that information required to be disclosed in the reports we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer, or CEO, and Chief Financial Officer, or CFO, as appropriate to allow timely decisions regarding required disclosure.

Based on an evaluation carried out as of the end of the period covered by this quarterly report, under the supervision and with the participation of our management, including our CEO and CFO, our CEO and CFO have concluded that, as of the end of such period, our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) were effective as of September 30, 2010.

Changes in Internal Control Over Financial Reporting

Based on the evaluation of our management as required by paragraph (d) of Rule 13a-15 of the Exchange Act, there were no changes in our internal control over financial reporting that occurred during our last fiscal year that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

Not applicable to smaller reporting companies.

Item 2. Unregistered Sale of Equity Securities and Use of Proceeds

None.

Item 3. Default Upon Senior Securities

None.

Item 4. Removed and Reserved.

Item 5. Other Information

None.

Item 6. Exhibits

(a) Exhibits

Exhibit Number	Description of Document

**Certification of Chief Executive Officer pursuant to Item 601(b)(31) of Regulation S-K, as adopted pursuant to
Section 302 of the Sarbanes-Oxley Act of 2002**

I, Dang Yu Pan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Highpower International, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
